

VISITECH GERMANY EXPANDS LEADERSHIP AND EXPERTISE TO DRIVE AM INNOVATION

Posted on October 2, 2024

TEAM EXPANSION: Alfred Jacobsen (left) and Manuel Oelsner are joined by Managing Director Levent Akbas and Application Support Engineer Elias Xu.

Strengthening an exceptional team

Visitech Germany is proud to announce the expansion of our team with key new appointments, reinforcing our commitment to excellence in the additive manufacturing space. Leading the charge is our new managing director, Levent Akbas, who brings extensive experience in the field and ensures we remain at the forefront of innovation.

Joining him is Application Support Engineer Elias Xu, whose expertise will further enhance our ability to support industry partners at a regional level.

Dedicated to DLP innovation

With these strategic additions, Visitech strengthens its ability to push the boundaries of digital light processing (DLP) technology, ensuring our global team of over 90 professionals continues to deliver world-class solutions. As we look to the future, we remain dedicated to innovation, growth, and deepening partnerships with our valued collaborators worldwide.

This marks an exciting new chapter for Visitech, and we're eager to continue leading the way in cutting-edge DLP light engine development.
